

CERTIFICATION

Based upon random sample testing by an outside analytical laboratory, using ashing of the sample for preparation and detection by atomic absorption, we certify that all packaging components (printing inks) sold in the United States by Monarch Color Corporation are below the CONEG level for heavy metals. The sum of the concentration levels of lead, cadmium, mercury, and hexavalent chromium present in any of our ink systems does not exceed 100 parts per million by weight.

COMPANY: Monarch Color Corporation
ADDRESS: 5327 Brookshire Blvd.
 Charlotte, NC 28216
